Education

Netaji Subhas University of Technology

B.Tech in Electrical Engineering / CGPA: 7.76/10

2023 – 2027

Delhi

Experience

SDE Intern

May 2026 – Jul 2026

Stealth AI Startup (Remote)

React, FastAPI, PostgreSQL

- Built **retrieval-augmented workflows** for internal knowledge tools, improving answer grounding and cutting unsupported responses in testing.
- Shaped multi-tenant ingestion: document chunking, embeddings, and **secure tenant isolation** for reliable retrieval.
- Shipped frontend and API surfaces in React, FastAPI, and PostgreSQL, turning research ideas into production features.

Projects

SirGoblin | *AI Code Safety Platform* | Python, MCP, CI/CD | [GitHub](#)

- Blocks unsafe AI-generated code before production, **scanning 100K lines in 22 seconds** across 52 rules from real outage postmortems.
- Built an **MCP server** exposing 7 verification tools over JSON-RPC, letting AI agents check their own work mid-task.
- **Cut AI review costs 4×** via model routing and batching (est. \$1,000+/month saved), and **raised accuracy 26%** auditing 8 open-source codebases.
- Architected solo from empty repo to **v0.1.0 release**: rule engine, contract graph, cost tracking, and CI/CD (**42K lines**, open source).

Invariant | *Adaptive DSA Practice Platform* | Next.js, TypeScript, PostgreSQL | [GitHub](#)

- Tells users **which coding problem to solve next, and why**, replacing static problem lists across **32 DSA topics**.
- Built an **adaptive recommendation engine** blending **5 signals**, led by an Item Response Theory model predicting per-user solve probability.
- Added **multi-armed bandit (UCB) exploration** for topic discovery, and **FSRS** memory-decay modeling to time reviews before forgetting.
- Shipped **13K+ lines** solo: 21-model Prisma schema, **17 REST endpoints**, Google OAuth, LeetCode/Codeforces sync, Docker, and CI.

Nexus RAG | *Multi-Tenant Agentic RAG Platform* | FastAPI, pgvector, PostgreSQL | [GitHub](#)

- Multi-tenant agentic RAG platform with **bring-your-own-key sovereignty** for querying private document corpora.
- Designed autonomous retrieval using **hybrid pgvector and full-text search** for high recall over private data.
- Unified ingestion across **4 formats** (PDF, Markdown, PPTX, images) with chunking, embedding, and answer grounding.

Achievements

- **Top 200 nationally** in the Amazon ML Challenge, 2025.
- Solved **400+ data structures and algorithms problems** across LeetCode and other practice platforms.
- Qualified for **Round 3** of EY Techathon 2025 and **Round 3** of Smart India Hackathon 2025.

Skills & Interests

Languages: C++, Java, Python, JavaScript, TypeScript

Web: React, Next.js, HTML, CSS, shadcn/ui

Backend & Data: FastAPI, REST APIs, PostgreSQL, Prisma, Supabase, pgvector, NextAuth, Docker

GenAI & ML: RAG, Agentic Workflows, Generative AI, MCP

Core: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Signals & Systems

Interests: Problem Solving, Building AI Products, Reading
